EDUCATION

Sichuan University

Chengdu, China

B.Eng. in Computer Science and Technology; Honors Class

Sep 2024 – Present

- **GPA: 3.96/4.00** · **Rank: 1st in honors class** · Weighted average: 93.76/100.
- Selected coursework: Operating System (99), Theory of Optimization (98), Probability Statistics (97), Introduction to Artificial Intelligence (96), Introduction to Multimodal Learning (90).

RESEARCH INTERESTS

Spatial reasoning in multimodal models (3D structure, depth, viewpoint); generative world models that simulate how scenes evolve, for embodied agents and vision-language-action (VLA) models. Background in generative 3D vision.

RESEARCH EXPERIENCE

City University of Hong Kong

Jul 15, 2026 – Present

Research Intern, Department of Data Science (Supervisor: Xinke Li)

Hong Kong

- Used video diffusion models for sparse-view scene generation: predicting unobserved views of a scene from a few input images.
- Studied Vision Banana (“Image Generators are Generalist Vision Learners”), which casts perception tasks such as depth estimation as image generation.
- Remote Jul 15–31; on site Aug 1 – Sep 1; continuing remotely toward a CVPR submission.

Bone-to-Shape: Single-Image Animal Reconstruction

Jan 2026 – Sep 20, 2026

Project Lead, Provincial Undergraduate Innovation Training Program

Sichuan University

- Combined AniMer-based animal pose and shape estimation with a ReconX-inspired sparse-view video diffusion stage and 3D Gaussian Splatting (3DGS) reconstruction.
- Generated orbit-view video from one animal image and studied how anatomical and body-shape priors constrain geometry; first-listed inventor on the related patent application.
- Passed the college midterm and final reviews.

Deep-Hole Guardian: Embodied Perception for Defect Inspection

Jan 2026 – Sep 20, 2026

Team Member, University-Level Undergraduate Innovation Training Program

Sichuan University

- Took depth-camera measurements and analyzed the resulting point clouds for deep blind-hole defect identification and control with a SCARA robot.
- Passed the college midterm and final reviews.

PUBLICATION

Yijia Chen, Ze Zhang, **Hanwen Zhang**, et al. “Kernel self-representation learning based fuzzy neighborhood outlier detection.” *International Journal of Approximate Reasoning*, 198:109769, 2026. [DOI](#). Third author; method design and formal analysis.

SELECTED PROJECT & INTELLECTUAL PROPERTY

Animal 3D Reconstruction Using Body-Shape Priors | *First-listed inventor*

Filed Sep 10, 2026

- Chinese invention patent application 202611403381.7; passed preliminary examination and is pending publication.

SELECTED HONORS

First-Class Single-Category Scholarship, Sichuan University (2025–2026) · Provincial Third Prize, Ascend AI Track, Huawei ICT Competition (2024) · Third Prize, Sichuan Division, Chinese Mathematics Competition (2025).

SKILLS

Research: generative 3D vision (3D reconstruction, 3D Gaussian Splatting, video diffusion, novel-view synthesis), depth point clouds

ML / Programming: PyTorch, scikit-learn, Python, C/C++; kernel self-representation learning

Engineering: Linux, Git, Docker, LaTeX, Qt, SFML; configuration-driven experiments and reproducible logs

Languages: Chinese (native); English (CET-6: 538)
