EDUCATION

Sichuan University

Sep 2024 – Expected 2028

B.Eng. in Computer Science and Technology; Honors Class

Chengdu, China

- **GPA: 3.96/4.00**, ranked **1/12** in major (the Honors Class is a selective standalone major).

RESEARCH INTERESTS

Multimodal reasoning about the physical world, and when it can be trusted: how multimodal LLMs and agents infer space, unseen regions, and change from images and video, and how to tell what they saw from what they imagined.

RESEARCH EXPERIENCE

City University of Hong Kong

Jul 2026 – Present

Research Intern, Department of Data Science (Supervisor: Xinke Li)

Hong Kong & Remote

- Improving the generation process of GenRecon, a TRELIS-based generative scene reconstructor, for sparse-view 3D reconstruction.
- Reproduced GenRecon and ReconViaGen and analyzed where errors arise across stages. Paper in preparation.

Bone-to-Shape: Single-Image Animal Reconstruction

Jan 2026 – Sep 2026

Project Lead, Provincial Undergraduate Innovation Training Program

Sichuan University

- Combined AniMer shape priors, novel views from a pretrained video diffusion model, and 3DGS for single-image animal reconstruction.
- Studied how body-shape priors constrain geometry across generated views; led to the patent application below.

Deep-Hole Guardian: Robotic Deep-Hole Defect Inspection

Jan 2026 – Sep 2026

Team Member, University-Level Undergraduate Innovation Training Program

Sichuan University

- Processed depth-camera point clouds for deep blind-hole defect detection in a SCARA-robot inspection system.

PROJECTS

MLLM Hallucination Mitigation with DPO | *Qwen2.5-VL, LLaMA-Factory* | [Code](#)

2026

- Course project: an LLM judge picks the least/most-hallucinated of ten answers, giving 5,059 DPO pairs.
- Fine-tuned Qwen2.5-VL-3B-Instruct with LoRA DPO on 8×A100 GPUs; evaluated on AMBER.

Paper Refiner: Multi-Agent LaTeX Revision | *Python, LLM APIs* | [Code](#)

2026

- Designed the orchestrator of a reviewer–editor agent loop that applies feedback as JSON patches to LaTeX.

PUBLICATIONS & PATENTS

Yijia Chen, Ze Zhang, **Hanwen Zhang**, Jiaqi Yang, Bingye Zhou, and Zhong Yuan. “Kernel self-representation learning based fuzzy neighborhood outlier detection.” *International Journal of Approximate Reasoning*, 198:109769, 2026. [DOI](#). *Contribution: method design and formal analysis*.

“Animal 3D Reconstruction Using Body-Shape Priors.” Chinese invention patent application No. 202611403381.7, filed Sep 2026; applicant: Sichuan University.

First-listed inventor. *Passed preliminary examination; pending publication, not granted.*

HONORS & AWARDS

First-Class Single-Category Scholarship, Sichuan University

2025 – 2026

Third Prize, Sichuan Division, Chinese Mathematics Competition for College Students

2025

Provincial Third Prize, Ascend AI Track, Huawei ICT Competition

2024

SKILLS

Methods: VLM fine-tuning (LoRA, DPO), LLM-as-judge pipelines, TRELIS, 3D Gaussian Splatting, point clouds

Tools: Python, C/C++, PyTorch, LLaMA-Factory, scikit-learn
